Forecast for Sunday 11 Jun 2023

Weather: A fine and dry start to the day with mist and ragged low cloud in some valleys, quickly clearing. Plenty of sunshine with light winds in the morning, feeling warm but very pleasant at height. Some scattered showers will develop from the south around lunchtime, spreading across the park during the afternoon. Some of these will be thundery, with torrential downpours, hail and strong winds before slowly north-westwards during the evening.

Chance of cloud-free hill tops above 800m: 70-80% around dawn but generally 90%.

Low Cloud and visibility: Some early low cloud in the south, as low as 300m, and perhaps some mist, clearing quickly after daybreak. Good in the morning, with uninterrupted panoramic views, but mediocre or even poor under any showers in the afternoon / early evening, with cloud base temporarily falling to 900m.

Valley	17/18	16/16	16/16	18/19	19/20	18/19	19/19	16/17	15/16
Freezing Level*	3100m	3000m	3100m	3100m	3100m	3200m	3200m	3200m	3200m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Warm or very warm, with very high UV levels and high humidity, so sun protection and extra water highly recommanded. A risk of heavy rain in the west, leading to swollen watercourses and possible flash flooding.

Forecast for Monday 12 Jun 2023

Weather: Remaining very warm with early mist and patchy low cloud in some valleys, followed by large amounts of sunshine. Further showers developing in the afternoon but perhaps not as many and not as heavy as Sunday.

Maximum wind: Easterly 10mph with gusts 20mph.

Chance of cloud-free hill tops above 800m: Generally greater than 95%.

Low Cloud and visibility: Good or very good through most of the day, with uninterrupted panoramic views, but mediocre under any showers in the late afternoon / early evening.

Temperature: **Valleys:** Plus 16 becoming plus 29 Celsius.
At 800m: Plus 10 becoming plus 20 Celsius.
Freezing level: Well above peaks.
